

Dear sir/madam. I distinctly and expressly detest NAB's petition 04-160 and totally support XM radio's ability to provide the kind of programming that I deserve. Since I am PAYING for the service, why should I be denied the traffic/weather information I need to do my job everyday? Tell NAB to take a hike. This is free enterprise, part of why America is great. Start denying free enterprise and watch what happens to this country- no more investment opportunity. XM put a great deal of money starting up this risky venture, which has turned into a state of the art system of digital wonder- I can't imagine having to live without it. If you people go along with NABs proposal you are taking away everything that is good and just. Please reject this foolish petition.

Thanks

JD
